

EDUCATION

Sector Overview

Investment in educational institutions is at the heart of governments social development programs in the region. The MENA countries recognize the implications of ensuring high quality education and its magnitude in ensuring a sustainable future economic growth. Substantial funds have been dedicated to decrease illiteracy rates through the development of a wide range of educational institutions across the region. We have an empirical experience in the educational development industry and we are specialized in the integrated MEP services for schools and universities' facilities.

Engineering Capabilities

We adopt specific design policies and applications of proven technologies and systems to provide cost effective alternate design concepts. Our engineering standards provide a comprehensive overview of the baseline concepts and philosophies for MEP design developments. To assure maximum quality and value during construction stages our project managers incorporate proficient costs scheduling and documentation tools and implement milestone based delivery approach that is based on, reliability, serviceability and cost effectiveness.

We Offer

- HVAC layout design and detailing
- Installation of large air handling unit
- Extract air ventilation system
- Duct work
- Condensate drainage & chemical dosing system
- Domestic water storage tanks, filtering and cooling systems
- Fire fighting & fire alarm system
- LPG & BMS system
- Power distribution system
- Facade lighting & lighting control system
- Audio video, CCTV system, UPS system
- Security access control system

Experience

- Zayed University, Dubai - UAE
- American School of Dubai, Dubai - UAE
- King Abdullah University for Science & Technology (KAUST), Jeddah - KSA
- College of Basic Education, Shuwaikh - Kuwait
- Special Training Centre, Shuwaikh - Kuwait
- Nursing Institute, Shuwaikh - Kuwait
- College of Health Sciences for Girls, Shuwaikh - Kuwait
